– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings were received on 02/22/05. These drawings are approved.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by JP2003-5863. JP2003-5863 a light guide plate, which guides illuminating lights from a light emitting element of the single Liquid crystal display device to opposite directions to each other to irradiate both surfaces of a main body part of the liquid crystal display device with the lights.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2875

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koide et al (particularly figure 13). Koide et al (particularly figure 13) discloses the claimed invention except for the teaching that the display is an LCD. Koide et al (particularly figure 13) discloses a light guide plate 304, which guides illuminating lights from a light emitting element of the single display unit 301 device to opposite directions to each other to irradiate both surfaces of a main body part of the display device 301 with the lights. The display 301 further includes an attenuation filter 303 which constitutes a liquid crystal. At column 4, lines 30-35, Koide et al teaches that LCD's can be used instead of double sided displays. It would have been obvious to one skilled in the art at the time the invention was made to substitute an LCD for the display and attenuation filter of Koide et al, figure 13 in order to provide a integral unit.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hamada et al and Yano discloses an LCD device similar to applicant's invention.
